

Request for Qualifications East Windsor Architectural Design Services For Field Lighting & Playground Design Addendum #2

Here are the notes from the RFQ Walk Through on September 26, 2022

- Is there suitable power available for the sports field and parking lot lighting? Does the consultant need to include time to investigate this? **Yes suitable power is available.**
- Does the town have survey information for the soccer field and playground areas? If not, should this be included in our scope? **Yes for soccer field, possibly for playground areas – if it is available town will provide it.**
- The sports field lighting vendor (i.e. Musco) will require geotechnical information to provide the proper light pole foundations. Should we include this scope? **Yes**
- Are any improvements to the parking or field access being considered from the master plan by the town for this RFQ? **Soccer field – just lighting of parking lot; Playground – parking and driveway to fit ADA requirements**
- The address stated in the RFP for the playground comes up as the Housing Authority, Park Hill neighborhood. Is this correct? **Yes address is correct for some reason google sends to housing authority (27 Reservoir Avenue) – East Windsor Park**

\$300,000 for Light Project and \$500,000 for Playground – these dollar amounts are not interchangeable between the two. Both projects will be bid to same organization.

Lights Project: Regulation field and sight lighting in adjacent parking lot
No plans or survey available for irrigation

Playground Project: Current lights and fences on field will be removed prior to project
ADA Playground – one structure catering towards 2-5 and one catering to 5-12.
Parking lot, sidewalks and shade structures to be included in scope of project. No lighting to be incorporated and no screening of surrounding properties.
